

Månadsrapport Februari 2020

The children at the Shelter ark Orphanage are fine and in good health. They are all continuing with their school education. They had two days holidays due to some Hindu festival. The children also participated in the Sports Day in our playground. All our orphanage children took part in the races and competition, and some of them won prizes in running race, potato race, lemon and spoon race, book balancing race, skipping race etc. This year the children participated in the Annual Day celebrations held in our playground. The bigger children performed skits and dramas. Our children also took part in group dances and songs.

The month of February was quite cool and pleasant. Early mornings and nights were cold.

Fourteen-year-old Karuna came to our Orphanage about five years ago. When she came her condition was very pathetic. Her father was an unstable person and depressed, and worked as a daily laborer earning a meagre salary. One day he ended his life by committing suicide. Her mother and her two siblings found themselves in dire need of finances to keep going. They lived in a rented house in the slums of Dharavi, and without any support they could not make ends meet. The mother had studied upto 4th grade and was unemployed. A well wisher brought this child to us. We accepted her into our Orphanage. Now she is studying in Std. VI. She and her two sisters are very happy to live in the orphanage and go to school.

We are once again very thankful to you for your love and concern for these dear children and for showing that you care for them. Our fervent prayers are that God would bless you abundantly and take care of all of your needs, and continue to make you a blessing to many more children.

With love and prayers,

Rani
